Carlos,

Just one comment – next to last paragraph says sampling results will provide information on the extent of contaminants released. Prior info we put out said sampled “to confirm no materials have been released from the site.” So, we could say for Carl’s letter:

“Laboratory results from the sampling that accompanied the repair will be available for review in February 2016 to provide information regarding **whether any** ~~the extent that~~ contaminants were released.”

Regards,

Gary Miller

Thank you for reworking that darn letter again but I would like to offer a smaller cover letter see the attachment. Do you think I am being too flip? Want to not poke back? Lemme know

Attachment to the letter is fine.
